

Advant**Edge** Program

Protecting Your SolarEdge PV Investments

SolarEdge Has You Covered

SolarEdge's DC optimization technology enables more energy, more revenue, and more insight into commercial PV system performance. The new AdvantEdge Program is designed to protect PV investments even further, giving system stakeholders greater peace of mind.

 System owners are guaranteed maximum revenue from module-level optimization

 EPCs benefit from improved, cost-effective O&M

AdvantEdge Program Overview

Insuring PV system stakeholders against production loss related to Power Optimizers

What is the AdvantEdge Program?

- / SolarEdge covers potential production loss resulting from Power Optimizer downtime
- / All Power Optimizers in an eligible site are covered for up to six months per Power Optimizer
- / Enrolled sites will be covered for a two year period

How does the program work?

- / The EPC is eligible for labor compensation resulting from Power Optimizer replacement, for up to two site visits per year
- / The AdvantEdge Report, containing all relevant Power Optimizer coverage details, is available for download at any time via the SolarEdge monitoring platform
- / SolarEdge sends the AdvantEdge Report to the EPC every six months, fully detailing the relevant coverage

How are covered Power Optimizers displayed in the SolarEdge monitoring platform?

- / An 'A' icon is visible in the monitoring platform's physical layout next to each module connected to the covered 2:1 Power Optimizer
- / Affected modules display energy production data based on neighboring modules in the solar array
