

Put Your Investment to Work

Our clients choose SolarEdge as their commercial solar partner to help them capture greater returns.

Global Reach

SolarEdge (NASDAQ: SEDG) is a global leader in smart energy and the world's #1 solar inverter company in revenue. We have millions of systems installed in 140 countries, representing nearly 54.5 GW of clean solar power. SolarEdge revolutionized sustainable energy with a ground-breaking intelligent inverter solution that decreases energy costs while maximizing energy production.

360° Support

From project design through commissioning and O&M, we are here to help you grow your business. Our call centers, service fleet, and tools are available around the clock.

Superior Safety

We continuously surpass NEC safety requirements with advanced control at the module level: every system comes with SafeDC™ — enabling Power Optimizers to automatically de-energize the entire array for maximum safety for people and assets.

✓ AFCI Certified to UL1699B | Rapid Shutdown Compliant to NEC 2014-2023

✓ Meets FM Global Property Loss Prevention Datasheet (1-15) engineering requirements

Industry Best Warranty

✓ 25-year Power Optimizer warranty

✓ Up to 20-year inverter warranty

Greater Design Flexibility

Our flexible site design capability opens up virtually any terrain to solar, enables more modules per site, and can help sites generate more energy than traditional string inverters. Savings are significant in shaded and space constrained areas. With SolarEdge, you can create strings of uneven lengths, in multiple orientations and different roof facets.

Making a World of Difference

Over **4** million worldwide installations continuously tracked through the SolarEdge Monitoring Platform

Over **50% of Fortune 100** companies have SolarEdge on their rooftops

Systems installed in **140+ countries**

Over **4,600 employees worldwide**

647 awarded patents

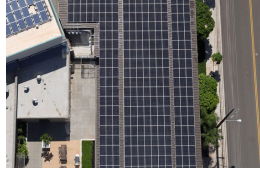

527 additional patent applications

Our Fields of Vision

for 480V and 208V grids

Enterprise/Large companies

Retail/Warehouse/Data Centers

Community Solar/Ground Mount

Agriculture

Schools/Universities

Healthcare

Government/Military

Floating Systems

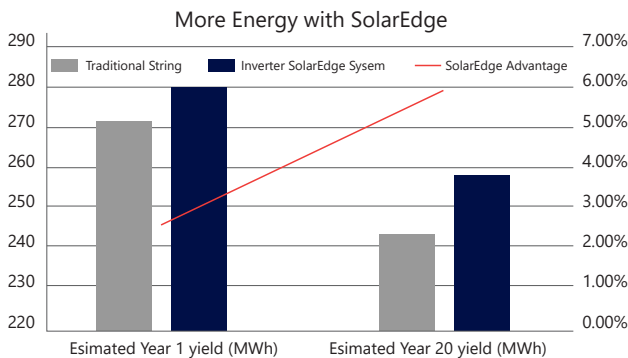

Big Box Stores

Carports

More Energy – More Savings

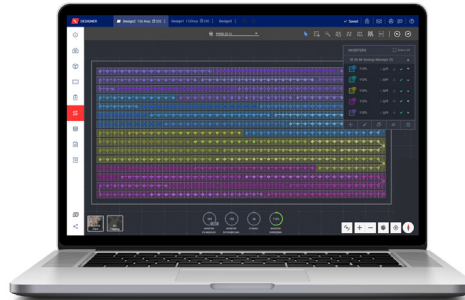

Enjoy increased energy yield and faster return on investment through our module-level maximum power point tracking (MPPT). SolarEdge mitigates power losses due to mismatch between modules for maximum power generation from each module.

Source: PVsyst analysis for this specific project. Numbers vary based on project sizes, components and location.

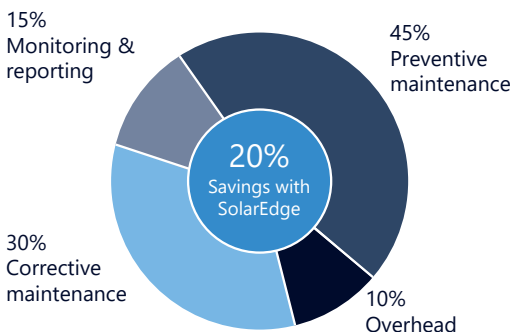

Up to 50% Lower BoS Costs

Our DC-optimized technology allows longer strings, which means less cabling, combiner boxes and fuses for reduced balance of system (BoS) costs. Use SolarEdge Designer software to further maximize space utilization and minimize BoS components.

Reduced O&M Costs

With module level monitoring, you get energy management capabilities and 100% system visibility to minimize your onsite visits and O&M costs.

Note: Numbers vary based on project sizes, components and locations

Sustainable & Robust

As a global leader in smart energy technologies, SolarEdge is committed to a sustainable world. SolarEdge is in full compliance with international standards on quality and control, ethical conduct, and environmental protection. SolarEdge products operate in a wide temperature range (-40°F to +140°F). They are designed to meet IP68 and NEMA6P ratings for water and humidity resistance.
