

SolarEdge Product Waiver Approval

Issue date: June 25, 2025

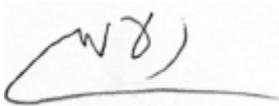

Dear installer,

Upon examining your waiver request, SolarEdge decided to approve it under the following conditions:

1. This approval is limited to installations in Europe, completed between the issue date and June 30th, 2026.
2. The approved design is as follows:
 - a. The connection of S1400 Power Optimizers with PV modules up to 750W in a 2:1 connection.
3. The rest of the installation guidelines, including the performance of the Inverter and Power Optimizer, remain as stated in the SolarEdge specifications and installation documents.

SolarEdge approves that the above design, though exceeding the Power Optimizer's maximum rated input DC power (1,500W vs 1,400W), will not void the Power Optimizer or Inverter warranty.

The sites must be connected to SolarEdge One for C&I.
